Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/678,334	Applicant(s) DENNER ET AL.	
	Examiner Hau V Phan	Art Unit 3618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) 9-11, 15 and 16 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8, 13 and 17-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Acknowledgment

1. The amendment filed on 1/26/2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-8, 11-14 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Heyden et al. (6,388,348).**

Heyden et al. in figures 1 and 3, disclose a drive system (10) for a motor vehicle. The drive system comprises a drive shaft (12), a centrifugal mass (24) mounted on the drive shaft for rotation about an axis and being profiled with a receiving space (Notice a space between ribs for bolts (30) mounted on, which can be considered a receiving space). Heyden also discloses an electrical machine (48) comprising a rotor (54) mounted on the centrifugal mass and a stator (46) arranged radially with respect to the rotor. The electric machine is being located radially outside of the receiving space and being radially aligned with the receiving space. Heyden also discloses a clutch (26) having at least one component (friction linings (38), pressure plates (36)) accommodated in the receiving space.

Regarding claim 2, Heyden et al. discloses the electrical machine, which is mounted on a side of the centrifugal mass, which is mounted to the drive shaft.

Regarding claim 3, Heyden et al. discloses a housing (74) having at least one part. The centrifugal mass and the electrical machine being arranged in the housing.

Regarding claim 4, Heyden et al. discloses a stator bracket (not number, as shown in figure 1), which attaches the stator to the housing.

Regarding claim 5, Heyden et al. discloses a cooling channel (not number, as shown in figure 1) in the stator bracket.

Regarding claim 6, Heyden et al. discloses the stator bracket bounds the receiving space radially.

Regarding claim 7, Heyden et al. discloses the centrifugal mass comprising a radially inner first area, a radially outer second area, and a third area connecting the first and second areas, which are offset both radially and axially.

Regarding claim 8, Heyden et al. discloses the first area and the third area that bound two sides of the receiving space.

Regarding claim 13, Heyden et al. discloses the clutch comprising a clutch disk (40) arrangement. The clutch disk arrangement comprises the component in the receiving space.

Regarding claim 14, Heyden et al. discloses the clutch comprising an actuating device (as shown in figure 1). The actuating device comprises the component accommodated in the receiving space.

Regarding claim 17, Heyden et al. discloses a diaphragm spring (34), which is accommodated in the receiving space.

Regarding claim 18, Heyden et al. discloses the at least one component comprising at least one torsion damper (36).

Regarding claim 19, Heyden et al. discloses the electrical machine, which is a starter-generator.

Response to Arguments

4. Applicant's arguments filed 1/27/2006 have been fully considered but they are not persuasive. In response to applicant's remark on page 6 that Heyden et al. fail to show a clutch mechanism (26), which is not in a receiving space, but radially inward from the electric machines (52, 58). The examiner disagrees, because Heyden et al. in figure 1; shown a receiving space, which is on a right hand side a fly wheel (26) or a space between a corner of the fly wheel or a space between ribs, which bolts (30) mounted a clutch housing (32) on. The receiving space is radially aligned with the electric machine. The clutch (26) includes a pressure plate (28), a spring (34), a friction lining (38) and a clutch disc (40), which are in the receiving space.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hau V. Phan whose telephone number is 571-272-6696. The examiner can normally be reached on 7:30AM-4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Ellis can be reached on 571-272-6914. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
